News Overview: [www.ubf.de/newsde](http://www.ubf.de/newsde)

**129650042 Industrial Ethernet PoE switch provides  
4x 30W Power over Ethernet  
according to IEEE 802.3at/af standard  
at 24V DC operating voltage.**

If there is already 12V or 24V direct current voltage available in the control cabinet, often a DC-DC converter is required in order to provide Power over Ethernet (PoE) according to IEEE 802.3at or IEEE 802.3af standard.

For this demand UBF EDV Handel und Beratung provides an industrial switch with 12V to 36V operating voltage.

Mounting occurs on a 35mm DIN rail.  
Alternatively also wall mounting with mounting plates is possible (both included in scope of delivery).

Dimensions and features meet the typical design of industrial devices.

This includes protection against reverse polarity and against overvoltage as well as alarm contact.
